

Tatting over a small plastic ring

©2012 Jennifer Williams

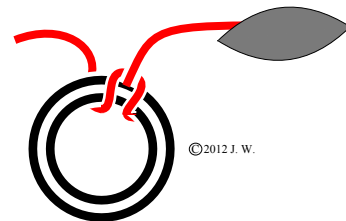

1) Hold the 'tail of the thread behind the curtain ring
Then pull a loop from the shuttle thread through the
ring - from back to front.

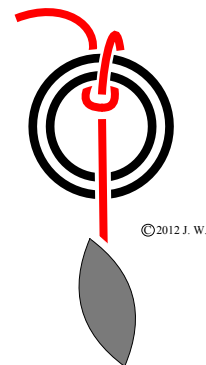

2) Pass the shuttle through the loop

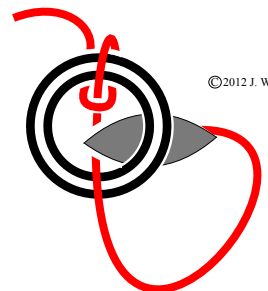

3) Pull the shuttle to tighten the first half of the stitch
on the curtain ring.
NB it doesn't look like a normal stitch at this stage

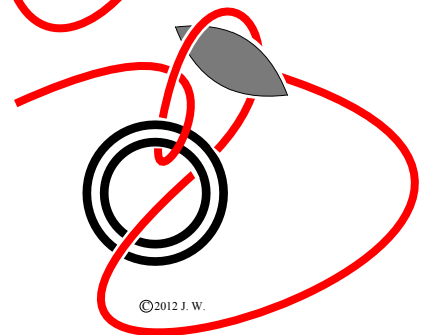

4) Bring the shuttle thread downwards - in front of the
curtain ring

5) Use your shuttle, take a loop in the shuttle thread
through the curtain ring from the front to the back.

6) Take the shuttle on through this loop

7) tension the thread and you will now have a double
Stitch.
